# CCU845

## CCTV CAMERA POWER BOX

CCU845 is a CCTV power box used to power a CCTV camera and light. In contrast to the CCU890, the CCU845 is used when no settings such as pan, tilt, zoom, light on/off are to be made during operation. The power box comes with a preset box for initial settings.

## APPLICATIONS

- Supplies power for a camera and lighting.
- Initial settings of zoom and light can be made with a preset box.

## BENEFITS

- Streamlined power box used when little operability is required.
